

BUTCHER BLOCK TOPS

The Warmth of Wood

Hevea wood adds warmth and elegance, with either side of the countertop available to you, giving you more flexibility for a personalized look to match any design aesthetic.

Acacia wood has a wood grain variation that brings unique beauty and sophistication. Like Hevea, either side of the Acacia countertop can be used. This gives two appearance options. One side graded to have "Bold" variation in grain pattern and color, and the other is graded to be "Muted" with more uniform grain and color.

Beautiful and Sustainable

Hevea and Acacia woods are harvested sustainably, resulting in less waste and reduced emission of greenhouse gases. You can feel good about bringing the beauty and warmth into your home.
